Mireille...  
more than  
workwear solutions!

**Mireille**  
INDUSTRIAL WASHING

... much more than laundry

# Mireille... more than workwear solutions !

Mireille has more to offer than you think. Over the years, Mireille has built up a great reputation as a laundry company and supplier of work clothing and work shoes. Mireille is a respected dealer of the following brands of workwear : Engel, Havep, Projob, Sioen, and its own private label. We have always offered our customers a workwear solution for t-shirts, polos and sweaters, including the brands Santino, BP, Sioen, Engel. For this we have a separate catalog, namely *"The suitable solution - De passende oplossing - La solution adaptée"*.

In this brochure you will find our range of "printables". T-shirts, polos, sweaters, fleeces and softshells from the brands Gildan, B&C, Fruit of the Loom and Kariban that we can provide with a printed logo or a printed slogan. With this range of "printables" we look, together with you, to other solutions than workwear solutions!

# The printable solution !

*First things first. Screen printing is a decoration technique in which ink is transferred onto textile through a mesh. They use one mesh per color so this action is repeated several times depending on the amount of colors in the design. It's also one of the most used techniques guaranteeing vibrant colors and high end finishing.*

## It all starts at 200 !

200 prints is the absolute minimum. Creating the meshes and prepping the machines for less would be too expensive for you as a customer.

Luckily for you 200 prints doesn't necessarily mean 200 pieces of the exact same type of clothing.

You can easily **spread your prints over different kinds of textile**. You could apply it to e.g. 100 T-shirts, 70 polos and 30 sweaters. Or any other way around **as long as the print stays exactly the same**.

## What else do you need to know about screen printing ?

As always, ordering **more prints at once results in a lower price**. So try to plan ahead and try to order as efficient as possible. It's ok to order a bit more if you plan on ordering again in the near future.

Colors do make a difference. A one color design will be cheaper than a 5 color design. As explained above, every new color means a new mesh that has to be made and prepared. Still, the price difference is marginal but now at least you know.

## What to expect from the Mireille printable solution ?

After we received all the printing requirements (see printing requirements on page 3) we will send you a price offer and a print-out for approval. **Each price offer will be valid for 14 days !** Important to know: **Mireille doesn't charge any artwork cost, set-up cost or shipping cost !**

## Printing Requirements

Mireille aims to provide the best possible service. You can help us do that by supplying the right kind of files in the right way. Our printing requirements section has more details on this. If anything is unclear, please get in touch with us!

### *Vector images (AI or EPS files):*

To create a print-out of the file for checking, and to guarantee that the printed images will be sharp enough, we need to receive your files as a vector image (ai. or eps. file).

**Use of colour numbers (PMS Pantone):** We print colours from the PANTONE colour chart. This chart consists of PMS numbers. Please provide the PMS number for the required colours.

### *Font style and font size:*

Convert any fonts used in the file to letter contours. If this hasn't been done, include the relevant fonts (font style and font size).

### *Printing size and position:*

To create a print-out of the file for checking, we need to know the size of the print (width x height) and the position where the print must be placed.
